

FIG. 2 is a schematic diagram of a system 200, including a first device 210, a second device 220, and a communication link 260. The first device 210 includes a first antenna 211 and a first processor 210. The second device 220 includes a second antenna 221 and a second processor 220. The communication link 260 is used for data transfer between the first device 210 and the second device 220. The system 200 is configured to perform a specific function, such as data collection or transmission.
